

Human Body Systems Project

Task: Your job is to research one of the systems in the human body with your cooperative group.

After completing the research, you will work collaboratively with your group members to create a presentation to display all of the information you learned. In your presentation you must answer all of the questions in the outline.

Outline Questions:

- * What is the purpose or function of this system? How does it help us to live?
- * How does the system work?
- * What are the body organs in this system? What is the main purpose of each?
- * Where in your body will you find this system?
- * What does it look like (a diagram might help)?
- * How does your body system work together with other systems in the body?
- * How does this body system stay healthy?

All research must be completed in short jot notes and put into your own words. You must reference where you got your information from.

When doing your research, fill in the research organizer that is attached.

Research Organizer

My Group Members: _____

Our Body System: _____

To answer the required questions, fill in the research organizer below. You must use jot notes and put information into your own words!!

<p>Purpose/Function How does it Help Us?</p>	<p>How it Works</p>
<p>Organs and Main Purpose of Each</p>	<p>Disease/Illness</p>
<p>Location</p>	<p>Diagram</p>

Interactions with other Body Systems	How to Keep it Healthy

ELA/Science Outcomes	/4
<p>Students will listen, speak, read, write, view, and represent to comprehend and respond personally and critically to oral, literary, and media texts</p> <p>* Create original texts, using your own words to show an understanding</p>	
<p>Students will listen, speak, read, write, view, and represent to manage ideas and information</p> <p>* Organize information and ideas into categories</p> <p>* Gather and record information and ideas using a plan</p>	
<p>Students will listen, speak, read, write, view, and represent to enhance the clarity and artistry of communication</p> <p>* Attend to Conventions - grammar, spelling, punctuation and capitalization</p> <p>* Prepare and share information on a topic using print, audio-visual, and/or drama</p>	
<p>Students will listen, speak, read, write, view, and represent to celebrate and to build community</p> <p>* Recognize on-task and off-task ideas and behaviours in cooperative groups, and stay on task; identify and solve group problems</p> <p>* Assume the responsibilities of various group roles; choose roles appropriate for getting the job completed</p> <p>* Work cooperatively with group members to carry out a plan, and troubleshoot problems as they arise</p>	
<p>Science - Cluster 0</p> <p>* Access information using a variety of sources</p>	
<p>Science - Human Body</p> <p>* Identify the major components of the body system, and describe the role of the system in the human body</p> <p>* Identify examples of how the body systems of the human body work together</p>
